## Yield curves, 3rd Quarter 2025

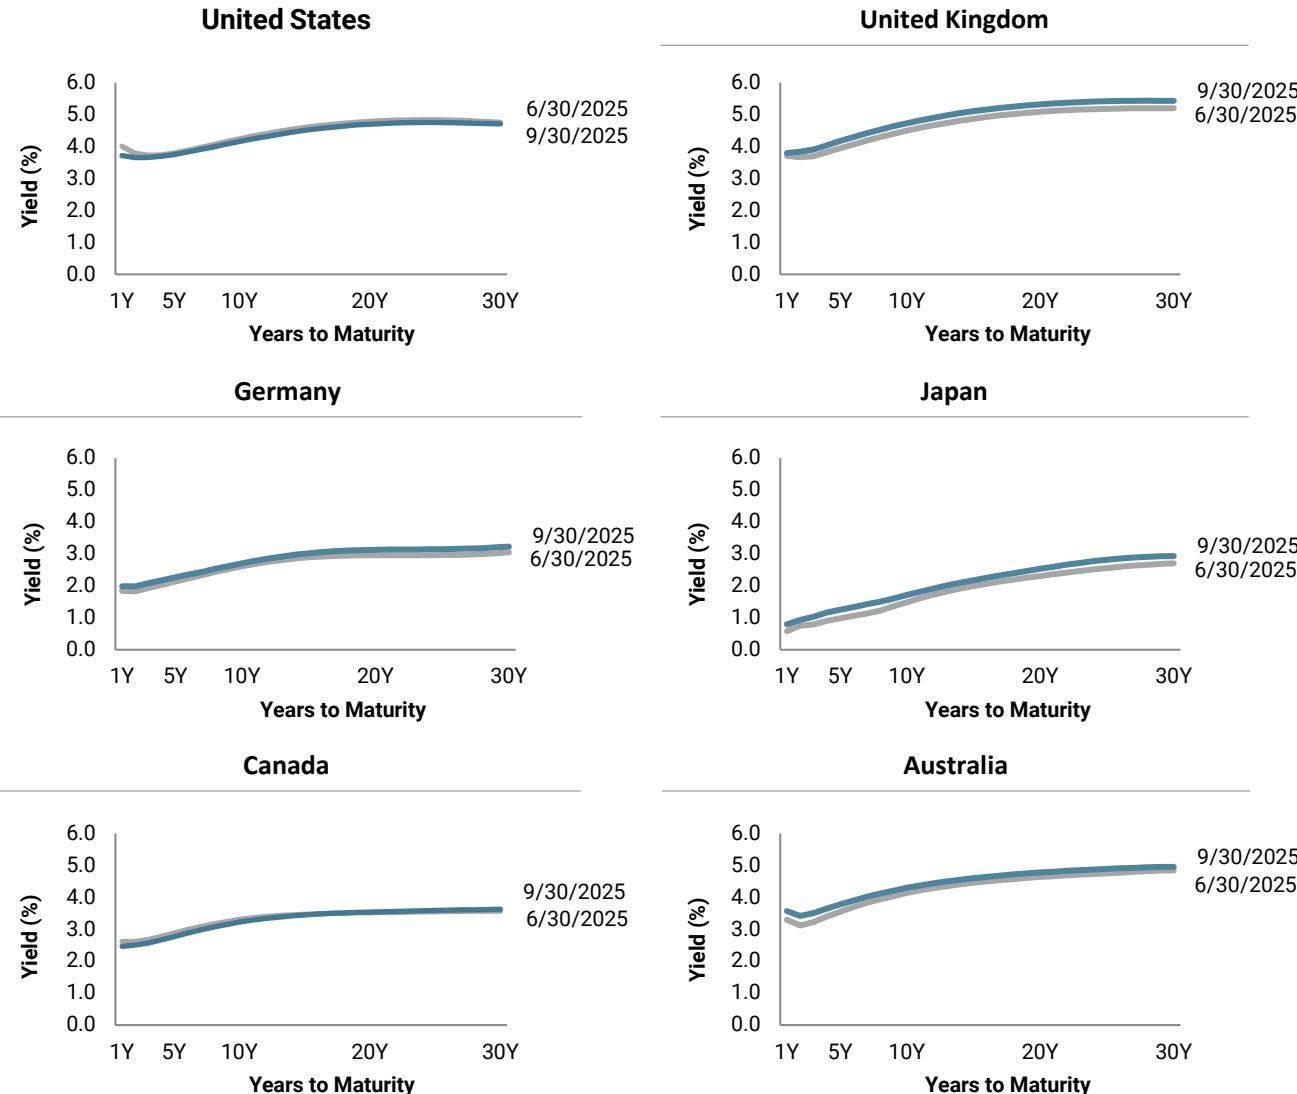

Except for the US and Canada, interest rates increased in the global developed markets for the quarter.

In Canada, short- to intermediate-term interest rates decreased, and long-term interest rates increased. The short-term maturity segment of the yield curve was generally flat but steepened in the three- to five-year maturity segment in Canada, Germany, UK and Australia.

Realized term premiums were mixed across global developed markets. Realized term premiums were positive in the US and Canada, as longer-term bonds generally outperformed shorter-term bonds during the quarter. However, realized term premiums were negative in the UK and Germany, as longer-term bonds generally underperformed shorter-term bonds during the quarter.

# AI Is Everywhere, Including Your Portfolio

Third Quarter 2025

Wes Crill, PhD, Senior Client Solutions Director and Vice President, Dimensional Fund Advisors

One of the most common investor questions regarding the rise of artificial intelligence (AI) is “How do I take advantage of it in my portfolio?” The good news for investors is diversified equity portfolios already have exposure, mainly because AI tools touch nearly every type of business these days.

Holdings of the five largest AI ETFs collectively span a sizable chunk of the market—42.5% of US stock market capitalization and 32.7% of global market cap. And it’s not just a few big companies like NVIDIA or Apple—in the US alone, 127 companies are included among these AI-focused strategies.

The pervasiveness of AI opportunities is evident when perusing the company names. The usual suspects from technology are well represented—all five hold NVIDIA—but less techy names like Caterpillar, Honeywell, and Thomson Reuters can be found within these ETFs. This exemplifies how AI is likely to touch virtually every business type, making it harder to predict the ultimate winners from the revolution. Broad diversification can help investors avoid missing out on these winners, wherever they show up.
